

.NET Developer (m/f/d)

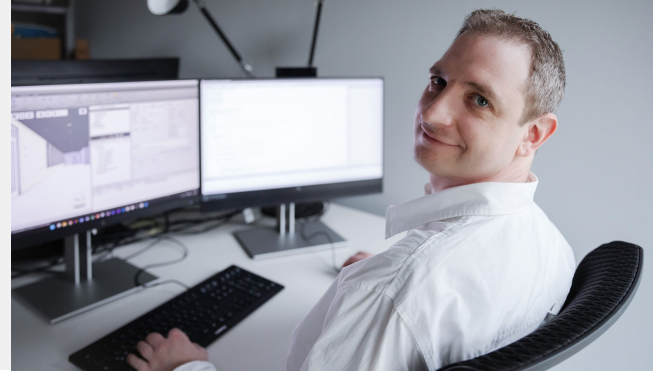

at our locations in **Heidelberg, Berlin, Dresden, Schwerin, Telfs, Neufelden, and Vienna**

Full-time, permanent

We are looking for motivated **software engineers** who want to drive the digitalization of the real estate industry with passion and creativity. **pitFM** is the leading operating system for digital and sustainable building management. Our mission: to make the real estate operations of the future economically, ecologically, and socially sustainable.

Do you want to develop the digital twin of the future in the real estate sector with an innovative team? Then the **pit Group** is the right place for you!

Your Responsibilities

- Conduct analyses, design processes, and implement complex business applications within the flexible pitFM development framework
- Develop new modules and enhance existing ones, including creating DLLs and web services (ASP.NET) based on the pitFM framework
- Create and integrate interfaces with complex third-party systems, such as ERP systems, document management systems, or Microsoft Graph
- Prepare development documentation and technical manuals to ensure all processes are clearly understandable
- Perform extensive testing and pilot phases to guarantee the quality of developed solutions
- Provide technical support at the 3rd-level

Your Profile

- You have a degree in computer science or extensive experience as a .NET developer
- You have basic knowledge of the .NET Framework and are motivated to deepen your expertise
- You have some experience with complex, relational databases (e.g., **MS SQL**)
- Conceptual and analytical thinking are among your strengths
- You are a communicative team player and enjoy working in a small, agile team
- You work independently, in a structured manner, and solution-oriented
- You are eager to continuously develop your skills
- You have good German language skills, both written and spoken (**C1**)

Who we are

The **pit Group**, consisting of **pit GmbH** (formerly Ing. Günter Grüner GmbH) and **pit-cup GmbH**, is one of the three largest providers in the D-A-CH region for digital building twins and sustainable building management. With over 30 years of experience, more than 2,000 renowned clients across various industries, and over one million users worldwide, we rely on innovative software solutions such as **pitFM** to enable resource-efficient and legally compliant building operations. Our group employs **120 experts** across **7 locations** in **Germany and Austria**.

Working with us means driving the digitalization of building operations and shaping a more sustainable future. We operate across teams and locations in a trusting, transparent, and fair environment.
