

Project Manager (m/f/d)

for projects in the IT/Facility Management sector at our locations in **Heidelberg, Berlin, Dresden, Schwerin, Telfs, Neufelden, and Vienna**

Full-time, permanent

Are you a digitalization expert in the real estate sector and want to help shape the building operations of the future? We offer exciting digitalization projects around the digital twin where your expertise is highly valued.

We are looking for new team members who, with passion and creativity, will further develop our products and approach projects with the same dedication as we do.

Your Responsibilities

- Lead, implement, and monitor facility management projects (both technical and commercial)
- Define milestones and approvals
- Conduct requirements and process analyses with clients (including events and workshops)
- Develop processes to optimally leverage synergies across planning, construction, and operations
- Prepare models and specifications
- Plan, manage, and control project resources, including quality assurance
- Present pit software to clients and at event

Your Profile

- Completed technical degree or equivalent education
- Experience in facility management and/or building services engineering (TGA)
- Basic CAD knowledge is an advantage
- Knowledge of relational databases (ACCESS, MySQL, Oracle)
- Leadership experience in software implementation projects
- Knowledge in technical, commercial, and infrastructural facility management
- Strong service, consulting, and sales orientation (confident customer interaction)
- Conceptual and analytical thinking, as well as teamwork and flexibility
- Good English skills, both written and spoken; additional languages are a plus

Who we are

The **pit Group**, consisting of **pit GmbH** (formerly Ing. Günter Grüner GmbH) and **pit-cup GmbH**, is one of the three largest providers in the D-A-CH region for digital building twins and sustainable building management. With over 30 years of experience, more than 2,000 renowned clients across various industries, and over one million users worldwide, we rely on innovative software solutions such as **pitFM** to enable resource-efficient and legally compliant building operations. Our group employs **120 experts** across **7 locations** in **Germany and Austria**.

Working with us means driving the digitalization of building operations and shaping a more sustainable future. We operate across teams and locations in a trusting, transparent, and fair environment.
