**The available range of functions may vary depending on the individual customer situation. For existing customers, the responsible project manager will assess the feasibility of specific functions in the web client. Some functionalities may only be available in the desktop client.*

Project Example for pitFM EXPERT Web

Enhanced IT Security through the Use of a Service Provider Cloud at BLB NRW

For sustainable and digital property management, BLB (Bau- und Liegenschaftsbetrieb NRW) uses pitFM Expert Web in a specially configured demilitarized zone.

With the help of our openAPI, work orders are exchanged between BLB and the FM service providers in a secure hybrid cloud environment.

**The process in the foreground.
The technology in the background.**
